

01 — Product Brief

Project: private fertility + pregnancy companion for women and couples | Flutter mobile app | Free MVP

Vision

- Build a calm, private, useful mobile companion that helps a woman track her menstrual cycle, understand estimated fertile days, record trying-to-conceive progress, and continue into pregnancy tracking after a positive test.
- Primary audience: adult women and married couples who are trying to conceive or tracking an existing pregnancy.
- Positioning: education + tracking + reminders, not a doctor, diagnostic system, contraception guarantee, or fertility guarantee.

Core Modes

- Cycle Tracking Mode: period dates, cycle history, symptoms, calendar and estimates.
- Trying to Conceive Mode: fertile-window estimate, optional intimacy tracking, ovulation-test tracking, reminders and educational guidance.
- Pregnancy Mode: gestational age, estimated due date, trimester, weekly information, appointments, symptoms and reminders.
- Couple Mode: optional husband/partner sharing with explicit consent and granular privacy controls.

MVP Features

- Onboarding and profile.
- Cycle/period calendar.
- Cycle history and average-cycle calculations.
- Estimated next period and estimated fertile window.
- Trying-to-conceive mode.
- Pregnancy mode and due-date calculator.
- Reminders.
- Basic education library.
- PIN/biometric privacy lock.
- Data export/delete controls.
- Offline-first local data storage.

Non-Goals

- No diagnosis of infertility, PCOS, miscarriage, ectopic pregnancy, fetal abnormality or any disease.
- No promise that a fertile-day prediction will result in pregnancy.
- No automatic medication prescribing or dosage changes.
- No public social feed in MVP.
- No monetization in MVP.

Success Criteria

- A new user can start tracking in under 2 minutes.
- Cycle data can be entered with minimal taps.
- The app clearly labels estimates as estimates.
- Pregnancy can be started from a positive-test flow without re-entering known dates.
- Sensitive data is protected locally and sharing is opt-in.

Medical/product source note

• Medical content in this document is product guidance, not a diagnosis or treatment protocol. Key fertility guidance references: American Society for Reproductive Medicine (ASRM), Optimizing Natural Fertility (2022), and ASRM Definition of Infertility (2023). Pregnancy urgent-symptom concepts should be aligned with current local clinical guidance.
